## PROFESSIONAL WELDING WIRES FOR HIGHLY DEMANDING WELDING APPLICATIONS

Selected virgin green rod  
(only from mineral), sourced  
from the most reliable  
European steel mills

Automated proprietary  
pickling process for  
improved wire surface  
conditions

Our customers around the world  
greatly benefit from our  
experience and technologies  
which contribute to improve the  
quality of their welds

# PROFESSIONAL BULK CONTAINERS ENGINEERED TO PROTECT THE WIRES AND TO ENHANCE THEIR PERFORMANCE

Retainer plate with flexible fingers to control the inner wire strands

---

Drop shaped corner tubes to prevent any pack deformation

---

Upper bracers to prevent pack expansion during handling and pack shrinking while in use

---

Bulk packs featuring their own built-in pallet

---

Contour matching pay-out retainer to control the outer wire strands

---

Fewer contact points for the wire coil

---

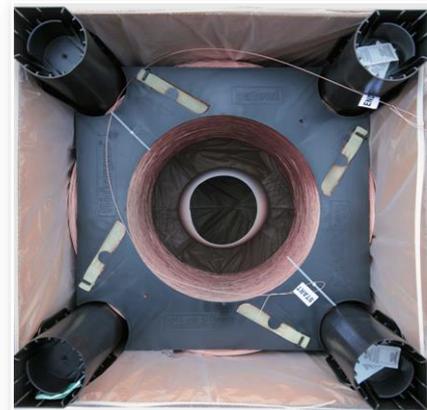

Inner frame support for large octagon shaped Masterpacs

---

Self-adapting free floating retainer plates

---

The largest bulk pack in the whole welding world (1200kg)

# SOLUTIONS FOR AN IMPROVED WIRE FEEDING AND PRODUCTIVITY

**24/7 endless wire feed system:  
the ultimate pack changeover  
downtime server**

**Portable wire butt welder to  
easily join wire ends from a used  
to new pack**

**Maxiglide liner, for a smooth wire  
delivery from your bulk pack to  
the wire feeding system**
