

**Sidergas S.r.l.** is a welding wire manufacturing company well known worldwide for having designed and introduced to the market its revolutionary technology Weldpoint® for twist-free winding welding wires into patented square pac. First company in the world, also for the winding of large diameter wires, such as those for submerged arc welding.

**Sidergas with passion continues to bring to the welding market a unique patented product, of quality and guaranteed by a fast and efficient service for customers all over the world. A solution for every problem aimed at joining metals.**

Since 2002 the company has developed a Quality Management System compliant with the requirements of the UNI EN ISO 9001 standard with the following field of application:

**Manufacture, marketing and after-sales technical assistance of GMAW, SAW and GTAW welding wires and related accessories. Design and production of innovative welding wire packaging.**

In recent years, the company has started a process to improve its environmental impacts and the health and safety of workers in its plants, increasingly integrating these aspects into its Organizational Model, up to adopting a Model compliant with Legislative Decree 231/01 in 2021.

The Management of Sidergas is constantly committed to keeping the Quality, Environment, Health and Safety Management System active and effective, making available the appropriate resources and periodically evaluating the results, as it considers this tool as the ideal support for:

- **promote the increase of the competitiveness** of its business and the continuous improvement of company performance;
- **ensure compliance with the laws, regulations and technical standards applicable to its sector**, in terms of product safety and approval, safety of workers and the work environment and data management;
- **pursue full customer satisfaction** and maintain over time the leadership position in the national and international market;
- **promote the involvement and awareness of all** staff for the application of the principles expressed in this Policy and for the commitment of each one in satisfying the expressed and implicit needs of Customers;

***The Management of Sidergas is committed to guiding the organization towards the following objectives:***

- **Working in partnership with internal and external actors** ensuring flexibility, efficiency and high competence, offering a high quality product, increasingly innovative thanks to advanced industrial production processes, selected raw materials and a managerial team motivated to take up new challenges.
- **pay attention to the needs of the market and its evolutions**, with the reduction and resolution of technical and commercial problems, in order to respond constantly and fully to the needs of customers and obtain their full satisfaction;
- **ensure the continuous strengthening and updating of machine structures and plants** for the quality management of production processes, in order to improve product quality, company productivity, the competitiveness of the company on the market, while reducing its environmental impacts and improving the health and safety of workers;
- **promote discussion and collaboration with suppliers**, in order to quickly solve problems that arise and prevent their occurrence, with a view to mutual strategic convenience;
- **promote the training and continuous updating of all staff and collaborators** and regarding internal and external quality and customer satisfaction, health and safety at work, for the professional growth of human resources at all company levels.
- **Eliminate hazards and reduce risks to the health and safety of workers and the environment**, ensuring safe and healthy working conditions for the prevention of work-related injuries and diseases.
