

Sidergas

professional welding wires

**[50 YEARS OF EXPERIENCE
OF INNOVATION]**

COMPANY PROFILE

BASED IN NORTHERN ITALY, CONNECTED TO THE WORLD

Corporate Offices:

SANT'AMBROGIO (Verona)

Manufacturing Plants:

DOLCÈ (Verona)

VOLARGNE (Verona)

CARCERI (Padova)

CAVENAGO (Lodi)

TORINO (Torino)

PROFESSIONAL WELDING WIRES FOR HIGHLY DEMANDING WELDING APPLICATIONS

STEEL

Selected virgin green rod (only from mineral), sourced from the most reliable European steel mills

Automated pickling process for an improved wire surface conditions

Our customers around the world greatly benefit from our experience and technologies which contribute to improve the quality of their welds

A winning combination: our square packs together with our twist-free winding technology

ALUMINIUM

Strictly selected high quality raw materials

Continuous improvement of our processes and up-to-date of equipment and infrastructures

Complete traceability at each stage of our production process

A wide range of pack formats for aluminium welding wires and tig rods

PROFESSIONAL BULK CONTAINERS ENGINEERED TO PROTECT THE WIRES AND TO ENHANCE THEIR PERFORMANCE

Retainer plate with flexible fingers to control the inner wire strands

Lighter flexible retainer plates for aluminium wires

Drop-shaped corner tubes to prevent any pack deformation

Upper bracers to prevent pack expansion during handling or transport and pack shrinking while in use

Bulk packs featuring their own built-in pallet

Contour matching pay-out retainer to control the outer wire strands

Fewer contact points for the wire coil

Inner frame support for large octagon shaped Masterpacs

Self-adapting free floating retainer plates

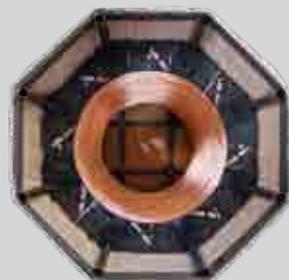

Masterpac content:
1200 kgs of carbon steel wires and 400 kgs of aluminium wires

The largest bulk pack in the whole welding world

SUPERPAC STEEL

SUPERPAC ALUMINIUM

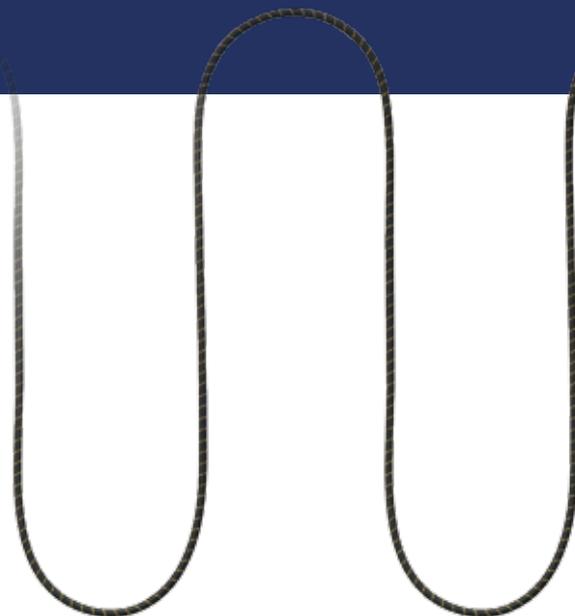

MASTERPAC STEEL

MASTERPAC ALUMINIUM

SOLUTIONS FOR AN IMPROVED WIRE FEEDING AND PRODUCTIVITY

Tension relief tube for aluminium welding wires

Maxiglide conduit with rolls to minimize friction

Stand alone rear smart-booster for a more effective and smoother wire feeding over long distances

24/7 endless wire feed system: the ultimate pack changeover downtime saver

Portable wire butt welder to easily join wire ends from a used to a new pack

Prompt and easy access to product related documentation like CoC, 3.1, SDS, PDS, DoP, Approvals, etc. through a smartphone app.
